## Description

Esterel is a soft natural rubber full-foot swim fin made in France by Sommap for diving, riverboarding and swimming.

### Features:

- Diving, swimming and training fin.
- Strengthens leg muscles during swim training.
- Comes with a long soft blade.
- Made of natural rubber for comfort and longevity.
- Popular and ideal for training routines.
- Very popular with swimming clubs and classes because of its durability.
- Produced in France.

## Antecedents

Sommap is the sole remaining manufacturer of natural rubber swim fins in France. At one time, the company made two closed-heel fins of this type: the Esterel (top left) and the longer-bladed Argonis (centre left) with two ribs on top for reinforcement. Now the company only produces one closed-heel fin, the Esterel, and one open-heel fin, the Alcyon (bottom left), which is NATO approved for military use.

The name and logo of the company are embossed on the top of the foot pocket in the latest release of the Esterel, while the name of the fin appears in uppercase letters on one side of the blade (below):

Previous versions of the Esterel came with the size and the model name with acute accent, Estérel, embossed on the foot pocket (below):

The size and the country of origin are embossed on the base of the fin (below).

The heel tread has a wavy-line pattern. The blade, which comes with a convex tip, is reinforced with two ribs on the underside only.
