Antecedents

The Gulf rubber swim fin illustrated above appeared on page 29 of the 1998-1999 KMAX Recreational Dive, Swim and Surf Equipment catalogue of the Kama Corporation of Taiwan. The description focused on the side rails, centre ribs, longer blade and contoured foot pocket.

After the withdrawal of the Gulf a few years later, the 88a rubber swim fin was launched with the same descriptors. The centre rib, however, now only appeared on the bottom of the blade, while the concave tip adopted its current smoother, arc-like appearance.

The 802 fin was introduced a few years after the launch of the 88a fin. It incorporated many of the features of the 88a fin, including the centre rib on the bottom of the blade, but its foot pocket was broader fitting and its concave blade tip bore a closer resemblance to the original Gulf fin.
